# SHAPE YOUR SPACE

## Products to Create the Ideal Home Studio

Want to devote some extra time to your dancing? A home studio lets you train anytime. Start with a portable floor so that you can cover the cement in your garage or basement with a safer surface. A lightweight barre can easily be stored away. Throw in some comfortable clothing and other small equipment for yoga, Pilates, or strength training. If you've been itching to try a new style but don't know of a nearby class to take, try an instructional DVD. When you're serious about dance, having a space devoted to your art will help you with your goals! —*Khara Hanlon*
